

Create your own Team Fundraising Page.

Example: <https://secure.givelively.org/donate/washington-first-robotics/if-robotics>

- Go to FIRSTWA.org
- Click on the GREEN Donate Button at the top right corner of the webpage
- Scroll to the bottom of the page and select “I want to fundraise for this”

- Follow the prompts to create your account. All you need is an email address, full name, and you must create a password.
HINT: Instead of using your personal name, use your team name or number so that the URL includes it. For example, First Name could be FRC and Last Name could be 360.
- Now you can edit your page. Write a few paragraphs about your team goals, values and fundraising target. Tell people why your team is special!
- Once you save your page, you will have a custom URL with your team name or number in the address. You can share it with everyone, and the donation that come through the page will land in your booster account automatically.
- If you need assistance let us know by email at Boosters@firstwa.org.
